## WORK EXPERIENCE

### Catalyte Software Developer (Dec 2021 - Present)

- Java E-Commerce API with Spring and Google authentication - Contributed to a team of 10 to build a sporting goods e-commerce application using Agile Scrum methodology, React, Jest unit testing and Cypress E2E testing
- Health Clinic Application - Built a React front-end and Spring Boot back-end for an N-Tier architecture application designed to help health clinic employees keep track of patients and appointments
- Garden Center API using .NET Framework - Built a backend API using .NET 6 which included model validation and complete swagger documentation.

### Barkman Honey (1 Year, 4 Months)

*Warehouse Worker*

### City of Hillsboro (Seasonal) (3 Months)

*Assistant Pool Manager*

### Jim Clark Chevrolet-Cadillac (11 Months)

*Auto Detailer*

Most of my previous work experiences have been in physical labor and customer service. In these positions, I've developed communication skills, learned to work in team environments, to manage my time effectively, and honed an eye for detail. All of these skills can be applied to Software Development, and I deploy them regularly.

## EDUCATION

### Catalyte Developer Training (4 Months)

### Kansas Wesleyan University (2 Years)

*B.S. of Software Engineering and Information Management*

### Tabor College (3 Years)

### Microsoft Certified: Dynamics 365

**Fundamentals (CRM)** (March 2022)

### Microsoft Certified: Power Platform

**Fundamentals** (March 2022)

## MY VISION

As a highly self-driven person with a passion for programming, I'm always on the lookout for new challenges to pursue, and truly push my skills to the limit. I also strive to be a leader among my peers and mentor those around me, elevating the performance of teams I'm working with. Accordingly, I envision bringing these qualities to my next projects and aim to further build upon both my technical and soft skills.

## TECHNOLOGIES

 .NET

 C#

 JavaScript

 React

 Java

 HTML

 CSS

 MySQL

 PostgreSQL

 Jest

 Cypress

 Git

 Gitlab

 Agile

## PROJECT I'M MOST PROUD OF

The Java E-Commerce project is a project I am especially proud of. This was the first full stack application I had been exposed to, and was the first time I applied Scrum methods to a project. Throughout the project, my supervisors and teammates consistently praised my technical skills as the best in the group. These skills, along with my natural leadership tendencies, also allowed me to effectively mentor and guide the rest of the team. As a result, our application met every functional requirement given for the project.

## ATTRIBUTES

- Quick learner
- Team oriented
- Natural leader
- Strong problem-solver
- Great attention to detail
